

Ancient Language Annotation Dossier

Classical Texts, Scripts and Transliteration

A portfolio sample for educational annotation, transliteration and historical-language presentation.

Document type	Annotated historical-language sample
Areas covered	Latin, Ancient Greek, Biblical Hebrew, Sanskrit and runic notation
Deliverable model	Transliteration, translation, note, context and uncertainty markers
Professional limit	Educational and documentary work; not religious, legal or academic authority

Prepared as a polished portfolio sample. The text demonstrates scope definition, editorial judgment, terminology control and multilingual presentation. It is not a sworn translation, legal opinion, medical advice or academic guarantee.

Editorial Method

Ancient-language work needs humility and structure. A credible sample separates the original form, transliteration, literal meaning, reader-friendly translation and contextual note. This avoids pretending that complex texts can be reduced to a decorative symbol.

Annotated Sample Table

Language	Text	Transliteration	Working note
Latin	Vita brevis, ars longa.	vita brevis, ars longa	A concise aphoristic structure; useful for motto and cultural commentary.
Ancient Greek	gnothi seauton	gnothi seauton	Imperative phrase; often translated as Know yourself. Original script can be supplied after font/source review.
Biblical Hebrew	shalom	shalom	Peace, wholeness or wellbeing depending on context. Direction and pointing are reviewed separately.
Sanskrit	dharma	dharma	Duty, order, law or teaching; original Devanagari or IAST form depends on the selected transliteration system.

Client-Facing Notes

- Decorative scripts should be checked before use in logos, tattoos, publications or ceremonial materials.
- Transliteration systems must be named when precision matters, especially for Sanskrit, Arabic and Hebrew.
- If a source is sacred, legal or culturally sensitive, Scriptorium should define the purpose of the work before accepting it.

Sample Deliverable

Final files can include a clean PDF, source notes, a glossary, alternative translations and a short explanation of uncertainty. This is more professional than presenting a single exotic-looking phrase without context.
